

SUSAN PERRIN ART CONSULTING

Art, when skillfully incorporated, can energize a public setting, reinforce a firm's image, give a sense of an organization's history, and elevate the caliber of an interior space. Since 1988, Susan Perrin Art Consulting has been working with architects, designers and clients to select and design art installations for business, public and residential sites.

With projects that span the country, we utilize nationally recognized artists, as well as the artistic resources of each particular location we serve, to create a distinct sense of place for every site. Services include all phases of art placement, from site evaluation to program development, selection presentation to framing and installation.

A cross-section of projects includes:
